

For over 30 years, Faculty of Arts, Chulalongkorn University, the first and one of the most prestigious universities in Thailand, has been offering a Thai language and culture program intended for foreigners for various purposes: academic, business, or just for their personal enrichment.

Why here?

Situated in the heart of Bangkok, Chula can give their students the chance to experience real life in Thailand's capital, apart from the knowledge of the Thai language and culture in class by our qualified teachers who are also our graduates. Apart from the lessons in class, students will be able to make friends with Thai students and join extra-curricular activities with them. Also included in the program are sightseeing trips which are offered to all students as part of the learning of Thai life.
