#### **Abstract**

This paper aims to reinvestigate the findings of the previous work of (Teerarojanarat and Tingsabadh, 2018) because the “change from Standard Thai to Non-Standard Thai” in the northeastern part of Thailand was predominant between 1979 and 2002. Another aim is to highlight the incorporation of GIS for the map display and spatial analysis of dialect change.

**Keyword:** Thai dialect, GIS, Thailand
